

Curriculum Vitae

Personal Information

Full Name: Majd Raiek Dayoub
Place & Date of Birth: Syria – Hama , 21/6/1993
Current Residence: Iraq, Basra
Nationality: Syrian
Gender: Male
Military Status: Exempted
Email: Majddayoub93@gmail.com
Phone Numbers: +963 934587710
+964 7827451212

Education

Degree: Bachelor's degree in (Mechanical Engineering)
Major: Metals Engineering (Metallurgy)
Institute: AlBaath university, Homs, Syria
Grade: 82.75%
Period: 2010 to 2016
Awards: Award of Academic Excellence for 1st-rank graduate
Graduation Project: Heat Treatments of Cast Irons

Languages

Mother tongue: Arabic
Second Language: English: Fluent

Computer skills

Expertise in Microsoft Windows OS.

Expertise in Microsoft Office suite [Word, Excel, PowerPoint, Outlook].

Expertise in SolidWorks design software.

Good Knowledge in AutoCAD, Liebherr Crane Planner, kranXpert.

Courses & Certifications

ASNT Level II (VT, LPT, MPI) - HIAST (Syria), 2/2020

ASNT Level II (VT, LPT, MPI, UT) - NAYA (Iraq), 11/2020

ASNT Level II (VT, LPT, MPI, UT) - NAYA (Iraq), 11/2023

LEEA Part (1) Entry (FOU) - LEEA Academy (UK), 2/2021

LEEA Part (2) Lifting Equipment General (LEG) - LEEA Academy (UK), 4/2021

LEEA Part (7) Offshore Containers (OSC) - LEEA Academy (UK), 6/2024

LEEA Part (8) Mobile Crane Examination (MCE) - LEEA Academy (UK), 11/2022

LEEA-Accredited Lifting Operations Supervisor - Royal Crown (Iraq), 5/2021

LEEA-Accredited Lifting Operations Supervisor - Royal Crown (Iraq), 8/2024

LEEA-Accredited Appointed Person for Lifting Operations - NAYA (Iraq), 2/2022

OPITO-LOLER Competent Person (LCP) - Quantum SkillUp (Egypt), 3/2023

LOLER Lifting Planner - Quantum SkillUp (Egypt), 3/2023

Advanced techniques in planning & supervising lifting operations - InspHigher UK, 10/2023

Lifting Operations Supervisor - Scope (Iraq), 3/2021

Lift Planning - NSL (UK), 7/2021

Rigging Loft Management - NSL (UK), 1/2022

Forklift Truck Operations - NSL (UK), 2/2022

Dropped Objects - NSL (UK), 8/2021

OSHA 30-hour General Industry Safety and Health - AlReem Co. (Iraq), 6/2021

Highfield Level 3 International Award in Delivering Training (IADT) - Milestone Industrial Training Experts (MITE) (India), 1/2022

Personal Qualifications

NDT Inspector, ASNT Level II (VT, LPT, MPI, UT)

Lifting Equipment Inspector (LEG, MCE, OSC)

Appointed Person for Lifting Operations, Lifting Planner & Supervisor

Work Experience

10/2020 - until now	<p>Company name: Aberdeen Technical Services & General Transportation (ATS)</p>
	<p>Job location: Iraq, Al-Basrah, Al-Barjesiah</p>
	<p>Job title: Lifting Engineer</p>
	<p>Job profile: As a Lifting Engineer, my work is focused on lifting operations, in the fields of Planning, Supervision, Inspection, Training, and Technical Studies.</p> <p>Duties:</p> <ol style="list-style-type: none"> 1. Appointed Person for Lifting Operations: establishment of lift plans (including Risk Assessment, detailed lifting studies and rigging calculations, selection of the lifting team and lifting equipment). 2. Establishment of lift plans (for onshore lifting operations), including: <ul style="list-style-type: none"> - ENI/PEG ZMDGS Expansion Project in Zubair Oilfield: loading/offloading and installation in DGS Expansion – Zubair Mishrif of Water Injection Equipment, such as pumps, motors, Vessels, Skids, etc. - Preparation of Rig Move Packages for Onshore Drilling Rigs: ZPEC Drilling rigs in Zubair Oilfield (Approved by SLB, Halliburton, and Eni), HH30 Drilling Rig in West Qurna 1 (Approved by SLB), DQ Drilling Rigs in Rumaila Oilfield, (Approved by BP), GW166 Drilling Rig in West Qurna 1 (Approved by SLB). - Other lift plans such as: SLBs’ Surge tanks and Gas Flare Stacks, GWDC Wireline Operations, Load Tests, etc.

- 3.** Supervision of lifting operations, including all company's lifting activities in ZMDGS Expansion project and supervision of lifting teams during rig moves in Basra Oilfields (Zubair, Rumaila, WQ1 Oilfields), including:
 - ZPEC, Daqing (DQ), HongHua (HH), Great Wall (GW) Drilling Rigs
 - Hilong and Great Wall (GWDC) Workover Rigs
- 4.** Providing technical consultations in the scope of lifting, such as:
 - Design of padeyes, spreader beams, & lifting frames, as per applicable standards (including related design calculations and simulations).
 - Providing detailed engineering rigging studies of loads.
- 5.** Establishment of NDT, Lifting Inspection, Lifting Operations, and Rig Move related documents (Procedures, Work Instructions, Forms, etc.)
- 6.** Performing of 3rd party NDT / Lifting inspection as per related standards.
- 7.** Preparation of company's documentations and attendance of audits for:
 - Inspection: Accreditation against ISO 17020, and approval by LEEA and contractors (Eni / ZFOD, BP / ROO).
 - Transportation: participation in the establishment of transportation department management system (approved by main operating companies and drilling contractors such as BP, Eni, SLB, Halliburton).
- 8.** Establishment of company's lifting personnel/equipment register and rigging loft management system.
- 9.** Following up the competency of personnel and integrity of equipment.
- 10.** Holding periodic internal awareness training, and safety meetings for ATS lifting crew.
- 11.** Preparation and giving lifting-related training materials (Appointed Person for Lifting Operations, Lift Planner, Lifting Supervisor, Crane Operator, Forklift Operator, Banksman/Slinger, Lifting Awareness).
- 12.** Study for quotations and preparation for technical studies / offers.
- 13.** Provision of required lifting-related items (e.g. lifting accessories).
- 14.** Conducting Road Hazard Identification (RHI).

2/2020 – 7/2020 <i>6 months</i>	Company name: United Technical Services (UNITECHS)
	Job location: Syria, Damascus
	Job title: Inspection Engineer
	Job profile: 1. Establishing NDT related documents. 2. Establishing of (Tensile, Hardness, Impact, Bending) SOPs 3. Performing of NDT inspections as per related standards.
7/2018 – 1/2020 <i>1 Year, 6 months</i>	Company name: Jewel aluminum extrusion (ZANOBIA Group.)
	Job location: Syria, Damascus countryside, Al Kiswah
	Job title: Mechanical Engineer – Technical Department
	Job profile: 1. Developing plans for the installation of production lines (vertical powder coating, anodizing, aging ovens, presses and extrusion lines... etc.) 2. securing all installation requirements from vendors. 3. Following up the fabrication of required parts in the company's fabrication workshops (design, casting, mechanical forming, inspection) 4. Communication with manufacturers and selection the appropriate offers. 5. establishment of work reports
3/2017 - 9/2017 <i>7 months</i>	Company name: International Company for Steel Rolling (ICSR)
	Job location: Syria, Homs, Industrial city of Hassia
	Job title: Metallurgy Engineer
	Job profile: 1. As a metallurgy engineer in the (Sand Casting unit), I was responsible for: preparation of production plan, drawing of castings using SolidWorks design software, designing of gating systems & determining casting parameters, preparation of molds and cores, preparation of induction furnace charge depending on product metal (steel, cast iron, chrome... etc.), Adjusting operating parameters of induction furnace, determining the stages and actions of the casting process, following-up machining, heat treatment, and inspection of castings. 2. Following up installation & operating of continuous casting machine unit, and operating of reinforcement bars production line (trainee engineer).
